## FLEXCONFIG RBS and FLEXCONFIG ANALYZER grow together Uniform file format – new appearance

### Göppingen, 30.11.2020 - FlexConfig RBS 5.2 and FlexConfig Analyzer 4.0 now available

Create **gateway configurations or restbus simulations** with just a few clicks and without extensive programming knowledge. **Simple drag-and-drop commands** together with **the graphical user interface** allow users to **operate** the system intuitively. FlexConfig RBS supports all common bus systems such as **CAN (-FD, -HS), FlexRay, Standard Ethernet, Automotive Ethernet (100BASE-T1, 1000BASE-T1), LIN and SENT**.

With this new version, users are now also able to **visualise bus data**. With **simple drag-and-drop commands** users can clearly transfer CAN, LIN or FlexRay data to a PC or **mobile end device** via **Wi-Fi or Ethernet**. The setups that have been created can be saved in **FlexConfig RBS** and then **opened** in **FlexConfig Analyzer** – this means that the same content is always available on both systems.

The renowned and **proven visualisation options** for FlexConfig Analyzer have been integrated into the current version of **FlexConfig RBS 5.2**. Users can now find a variety of **graphical elements such as Line Chart, Bar Chart, Tacho, Lamp, etc.** that provide for an easy and clear signal visualisation/analysis. The simultaneous release of the two tools also coincides with the introduction of a **common file format for FlexConfig RBS 5.2 and FlexConfig Analyzer 4.0**. **All display setups** can now be **exchanged** between the two tools. Irrespective of whether a change is made in RBS or Analyzer, **the exchange works in both directions**.

FlexConfig RBS now also has a new tab. This allows **end-to-end encryption** to be conveniently **created** using **graphical user interfaces**, which can be **configured separately for each element**. The signals that are received can be **physically read and written**. These **values can now be streamed** via a PC hardware interface.

**Optimised database loading times** reduce project processing time to a minimum, while **FlexConfig RBS PRO** also means that **user functions** can be imported. This allows **multiple team members** to **work on** the same FlexConfig RBS project **before merging the content**.

## About STAR COOPERATION

Networked competence and passion for your success: Since 1997, STAR COOPERATION has been supporting companies of all sizes and sectors in efficiently planning, designing and successfully implementing projects. Customers benefit from interdisciplinary know-how and synergies in the areas of CONSULTING, ELECTRONICS, ENGINEERING, IT, LOGISTICS AND MEDIA. Drawing on experienced experts from the field, STAR® delivers innovative ideas and well thought-out solutions that are precisely adapted to their customers and the individual needs of each project. This means they can make the most of your resources and improve every day.

STAR COOPERATION GmbH is certified under the management systems DIN EN ISO 9001:2015, ISO 50001:2011, ISO 14001:2015 and ISO 45001:2018.

Concentrated know-how in the field of ELECTRONICS. Our automotive electronics experts provide extensive solutions in the field of workshop, production and development for test and validation of automotive E/E systems for all power and voltage ranges as well as all bus systems
